

Brio[®]

TOP HUNG STRAIGHT SLIDING SYSTEMS

For panels up to 400kg

Brio®

where ideas unfold

Brio stands for high-quality, sliding and folding door hardware which is expertly designed, assembled and tested, in Australia. Our products breathe light into buildings by bringing the outdoors in, opening up spaces and creating havens.

We have a passion for turning design ideas into functional solutions, whether connecting living spaces with beautiful vistas or providing flexible work areas for classrooms and offices.

As part of the Allegion family of brands, Brio has local expertise backed by global resources which is why Brio is a leader in door hardware solutions. It is why we are the trusted choice time after time.

Sliding solutions

From family homes to high performance workplaces, Brio sliding systems are the secret to transforming and making the most of any space.

Designed to be quiet, safe and easy to use, Brio hangers feature precision bearings and durable conical wheels. They are also designed to remove fiddly, loose components and provide set and forget locking technology.

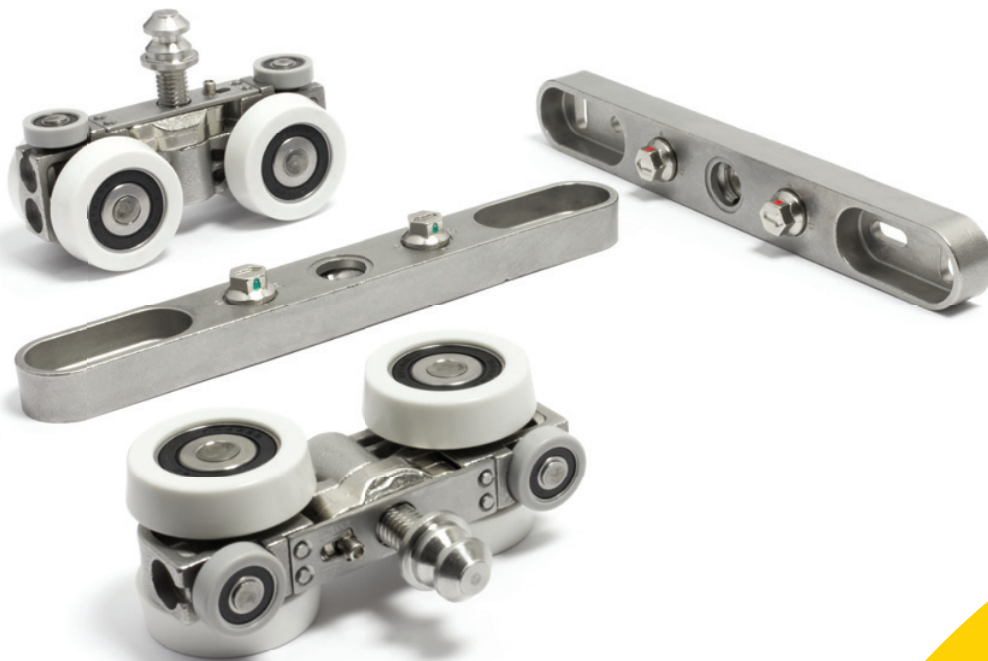

Versatility is a core element of our design. These sliding systems can be used in both residential and commercial environments and suit a range of door and shutter constructions such as timber, aluminium, and composite materials.

Our Quick Run system is designed for interior sliding doors up to 120kg in weight, while the Pro Run systems are designed for doors up to 200kg and 400kg in weight. Both ranges can be face fixed to a reveal or mounted into a recess for a streamline solution. Track configurations allow for single panels sliding, dual panels bi-parting or multiple parallel tracks for bypassing and stacking openings.

Brio's variety of hanger and guide choices means our systems can be used in a range of applications:

- Internal pocket doors
- External shutters
- Room dividers
- Patio and balcony doors
- Large glazed facades

Systems are also designed to operate with Brio's soft close accessories which can be used with doors as heavy as 300kg. The neat design allows our soft closers to be housed inside the track, ensuring minimum clearances between track and panel are maintained while doors close quietly and safely.

Quick Run 120

Suitable for aluminium and timber panels up to 120kg, this system provides quick and easy installation with secure locking for peace of mind.

The four engineered polymer, conical shaped wheels provide whisper quiet operation while the high-precision steel bearings allow fingertip control. The unique design ensures a straight running panel and lower operating force.

Purchased as components or in convenient kits, Quick Run systems use the adjustable clip stop 120CS to secure panels as standard but can easily integrate with the 120SCT soft close for superior operation. Additional accessories include a track fascia to dress face fixed systems and our telescopic kits which allow multiple panels to traverse an opening in synchronisation, perfect for wide openings and room dividers.

Brio Quick Run 120 hangers offer three versatile designs which when combined with our multiple track and guide options, provide a solution for every application. All Quick Run 120 tracks are available in 25µm clear anodising for improved corrosion performance.

Specifications

Max panel weight:	120kg
Min panel thickness:	28mm

Optional Accessories

Soft Close:	120SCT (40-120kg panel)
Telescopic:	TEL/2 (Max panel weight 120kg) TEL/3 (Max panel weight 100kg)
Simultaneous:	SIM/2 (Max panel weight 120kg)
Track Fascia:	123
Door Collector:	924-DC

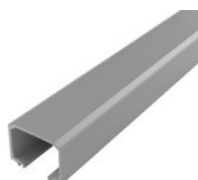

Common Application Solutions

Aluminium glazing

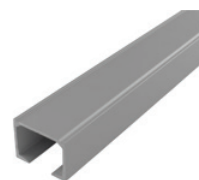

120C track designed to integrate with ceiling tiles

Surface mount multiple stacking

120E track can be soffit or face fixed, operates with telescopic & simultaneous kits

Zero clearance pocket door

120F track can be flush mounted for a clean look

58JNP hanger designed for aluminium panel recess installation

57JNP hanger for quick and easy, surface mount installation

61JNP hanger provides minimal clearance between track and panel

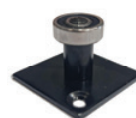

105AA guide with built in adjustment for aluminium panels

106A/94 guide designed for multiple panels

94PPA channel suitable for 104W/94 (shown), 106A/94 and 106E/94 guides

Multiple configurations available for each application solution

Designed by Shaun Lockyer Architects, photography by Scott Burrows Photography

Pro Run

The Pro Run systems are the most versatile and robust of all the Brio straight sliding options. Able to accommodate aluminium and timber panels from 120 to 400kg, it is suited to both internal and external applications.

Pro Run features all the versatility and engineering of the Quick Run system, but with the ability to support heavier panels and larger glazed openings. This allows uninterrupted views while protecting spaces from the elements.

Hanger bodies are made from cast stainless steel and feature six precision stainless steel bearings which have larger wheel diameter, providing an even smoother operation.

To prevent large panels becoming a safety hazard, Pro Run systems come with a dampener stop as standard and have an optional, market leading, soft close for panels up to 300kg.

This system is compatible with the Brio telescopic kits and our simultaneous kit which connects two bi-parting panels to open and close in unison, creating a truly grand entrance.

Specifications

Max panel weight:	400kg
Min panel thickness:	40mm

Optional Accessories

Soft Close:	200-SC (Panel weight 120-200kg) 300-SC (Panel weight 201-300kg)
Telescopic:	TEL/2 (Max panel weight 120kg) TEL/3 (Max panel weight 100kg)
Simultaneous:	SIM/2 (Max panel weight 120kg)
Track Fascia:	403E
Door Collector:	924-DC

300-SC:
Soft Close

400-DS:
Damper Stop

57SS/M:
Surface mount

58SS/M:
Recessed mount

61SS/M:
Zero clearance:
