

Brio[®]

BOTTOM ROLLING STRAIGHT SLIDING SYSTEMS

For panels up to 300kg

Brio[®]
where ideas unfold

Brio stands for high-quality, sliding and folding door hardware which is expertly designed, assembled and tested, in Australia. Our products breathe light into buildings by bringing the outdoors in, opening up spaces and creating havens.

We have a passion for turning design ideas into functional solutions, whether connecting living spaces with beautiful vistas or providing flexible work areas for classrooms and offices.

As part of the Allegion family of brands, Brio has local expertise backed by global resources which is why Brio is a leader in door hardware solutions. It is why we are the trusted choice time after time.

Doors by Windoor Joinery, designed by C Plus C Architects, photography by Renata Dominik

Sliding solutions

Bottom rolling panels offer easy installation and smooth operation of large glazed panels to frame beautiful vistas. This practical choice is popular on projects as it eliminates the need for overhead, supporting lintels and tracks as the weight of the door is supported at the base.

Brio's bottom rolling, straight sliding systems can be used for internal room dividers or external windows and doors, accommodating biparting panels on a single rail or bypassing stackers on multiple parallel rails for openings up to 14m wide.

Also part of the Allegion family of brands and proudly manufacturing in Australia for over 40 years, Austral Lock delivers market leading locking solutions for windows and doors. Together, Brio and Austral Lock offer a comprehensive hardware package, ensuring seamless performance, security, and style for any sliding door application.

Timberoll 100 & 200

Both bottom rolling systems feature self levelling, adjustable double bogies with easy side access for in situ adjustment. This design accommodates timber seals and allows rollers to be housed in the rail of the panel, retaining maximum strength in the corner joint. Timberoll 100 supports up to 100kg with quiet nylon rollers and steel case and bearings, ideal for internal and external, non-coastal applications. Timberoll 200, made entirely from stainless steel, offers a 200kg capacity and superior corrosion resistance for coastal environments.

Timberoll 300N

Timberoll 300N features an adjustable double bogie with acetal tyres and precision bearings for smooth, quiet operation in a durable, stainless steel body designed to fit both aluminium and timber frames. It offers end feed adjustment and supports multiple panels on single or parallel rails, enabling flexible large openings.

Timberoll 300N 913DBA-300N

Complementing these system is the 612 Insect Screen which provides protection against pests while allowing seamless indoor outdoor living. Assembled in Australia, the screen covers openings up to 9m wide and retracts discreetly into the opening's jamb.

For secure locking, Austral Lock's Virtus mortice sliding lock pairs perfectly with Verta and Forge door furniture, delivering both functionality and style to complete any sliding door project.

Specifications

Max panel weight:	100, 200 and 300kg
Max panel height:	
Timberoll 100	2400mm
Timberoll 200 & 300	3000mm
Max panel width:	1800mm
Min panel thickness:	40mm
Panel type:	
Timberoll 100 & 200	Timber
Timberoll 300	Aluminium and Timber

Optional Accessories

612 insect screen:	
3200mm H x 4500mm W	
Black PC screen	RSDL32-45PBK
Black PC frame	KIT-12-TPBK
2400mm H x 2000mm W	
Black PC screen	RSDL24-20PBK
Black PC frame	KIT-6-TPBK

Other sizes and colours available

Virtus mortice sliding door lock:	
40mm backset lock body	MSDL40AS

Furniture:	
Zinc, powder coat finishes	Forge
Stainless steel, SS & PVD Black finishes	Verta

Other versions available

Doors by Watts Glass with 612 screen and Verta furniture
