

# SL3 Series

Door furniture

The Schlage SL3 triple function entry lock is a high quality three in one locking system, offering a stylish minimalist design.

The Schlage SL3 Series entry lock is versatile, featuring three easy to operate functions which meet all the security needs of a modern household. The SL3 incorporates three functional modes which allow users to operate the lock in a freedom (passage) mode for free access from either side of the door, a safety (privacy) mode for external locking with free escape without a key from inside, and a security (deadlock) mode which locks both the levers with a key from either side and can only be unlocked using a key.

The Schlage SL3 Series is supplied with the stylish Leonardo lever which compliments the Schlage Regent Series for consistent lever design throughout the home.

This lock is compatible with most common industry door preparations (54mm hole) and is easy to install.

## Features

- Three function modes: passage, privacy and deadlock
- Modern minimalist contemporary lever design and plate profile
- Built-in security and privacy button for ease of use
- Concealed four-point, through door fixings
- Discreet key cylinder profile
